

SoftCap[®] – SpO₂ Sensors

» Optimal patient comfort and reliable disinfection

» PRODUCTS that care
for you «

Flexible, robust and hygienic «

The SoftCap® Sensors from the Rubberboot® series are the 3rd generation of soft sensors utilising the latest production technologies, materials and design elements.

The new Thermo-Q optosets from bluepoint® MEDICAL have a thermo-balanced light radiation characteristic with high light efficiency which significantly improves signal to noise ratio.

PATIENT COMFORT

- Structured design elements for an ergonomic fit
- Compared to conventional finger clip sensor technology does not adversely affect perfusion
- Bio-compatible and latex free silicone housing helps to prevent allergic skin reactions
- Reduced pressure load on the finger enables longer repositioning intervals

FLEXIBLE AND ROBUST

- Elastic and flexible sensor head
- Sensor head resists highest mechanical stress in comparison to conventional finger clip sensors

RELIABLE

- The construction and design minimise both motion and ambient light interferences

Typical applications

The **SoftCap®** Sensors are suitable for the following applications:

- Clinical operations
- Rescue services and emergency medicine
- Sleep studies
- Homecare
- Long-term monitoring
- Stress testing

The clinically tested and validated oximetry sensors from **bluepoint®** MEDICAL are fully compatible replacement sensors intended for use with most brands of pulse oximeters and modules.
